IN THE CLAIMS:

The pending claims are set forth below and have been amended and/or cancelled, without prejudice, where noted:

1. (Cancelled)

- 2. (Currently Amended) The composition of claim 1 30, wherein the ESCR enhancing additive is added to the polymer composition in amounts of from about 0.1 wt% to about 6 wt% of the composition.
- 3. (Currently Amended) The composition of claim 1 30 further comprising mineral oil in amounts of from about 0.1 wt% to about 6 wt% of the composition.
- 4. (Currently Amended) The composition of claim 1 30, wherein the resulting composition has an ESCR value greater than about 75.
- 5. (Currently Amended) The composition of claim 1 30, wherein the rubber is in the range of about 5 to 15 percent by weight.
- 6. (Currently Amended) The composition of claim 1 30, wherein more than one ESCR enhancing additive is present in the amount of about 0.5 to about 3.0 percent by weight each.
- 7. (Currently Amended) The composition of claim 1 30, wherein the ESCR enhancing additive comprises a liquid synthetic hydrocarbon.

- (Currently Amended) The composition of claim 1 30, wherein the ESCR 8. enhancing additive comprises polymerized alpha-olefins of at least 10 carbons having a viscosity range of about 200 - 1000 cst @ 99 °C.
- 9. (Currently Amended) The composition of claim 1 30, wherein the ESCR enhancing additive comprises polymerized alpha-olefins of at least 10 carbons having a density range of about 0.80 - 0.95 g/cc @ 25 °C.

10. (Cancelled)

- (Currently Amended) The composition of claim 1 11. 30. monovinylaromatic monomer is selected from the group consisting of styrene, wherein alphamethyl styrene and ring-substituted styrenes.
- 12. (Currently Amended) The composition of claim 1 monovinylaromatic monomer comprises styrene and the additives are added to the <u>30.</u> wherein eempound composition prior to or during polymerization.
- 13. (Currently Amended) The composition of claim 4 31, wherein the ESCR enhancing additive comprises atactic polypropylene and the final composition has an ESCR of at least 75.
- (Currently Amended) The composition of claim 4 31, wherein the ESCR enhancing additive comprises copolymers of ethylene and propylene that are amorphous ethylene-propylene copolymers.

- 15. (Original) The composition of claim 14 wherein the molar heat of fusion for the copolymer is less than about 190 J/g.
- 16. (Currently Amended) The composition of claim 4 30 further comprising a chain transfer agent.

Claims 17-19. (Cancelled)

(Currently Amended) A process for producing a composition, comprising:

polymerizing a mixture of a monovinylaromatic monomer and rubber, the monovinylaromatic monomer being selected from the group consisting of styrene, alphamethyl styrene and ring-substituted styrenes, and the rubber being selected from the group consisting of polybutadiene, polyisoprene, copolymers of butadiene or isoprene with styrene, and natural rubbers, and

adding to the mixture of monomer and rubber, prior to or during the polymerizing process, at least one ESCR enhancing additive chosen from the group consisting of polyisobutylene, polymerized alpha-olefins of at least 10 carbons, ataetic-polypropylene, or a polyolefin copolymer.

- 21. (Original) The process of claim 20 further comprising adding mineral oil to the mixture in amounts of from about 0.1 wt% to about 6 wt% of the composition.
- 22. (Original) The process of claim 20 wherein the ESCR enhancing additive is added to the mixture in amounts of from about 0.1 wt% to about 6 wt% of the composition.

- 23. (Original) The process of claim 20 wherein the resulting composition has an ESCR value greater than about 75.
- 24. (Original) The process of claim 20 wherein the rubber is in the range of about 5 to 15 percent by weight.
- 25. (Original) The process of claim 20 further comprising adding a chain transfer agent to the mixture.

Claims 26-29. (Cancelled)

Please add the following new claims:

30. (New) A composition comprising:

a rubber-modified polymer formed by the polymerization of a monovinylaromatic monomer in the presence of a rubber selected from the group consisting of natural rubbers, polybutadienes, polyisoprenes, and copolymers of butadienes or isoprene with styrene; and

at least one ESCR enhancing additive chosen from the group consisting of polymerized alpha-olefins of at least 10 carbons.

(New) A composition comprising: 31.

a rubber-modified polymer formed by the polymerization of a monovinylaromatic monomer in the presence of a rubber selected from the group consisting of natural rubbers, polybutadienes, polyisoprenes, and copolymers of butadienes or isoprene with

at least one ESCR enhancing additive chosen from the group consisting of atactic

polypropylene or polyolefin copolymers; and

mineral oil in amounts of from about 0.1 wt% to about 6 wt% of the composition.

32. (New) A composition comprising:

a rubber-modified polymer formed by the polymerization of a monovinylaromatic monomer in the presence of a rubber selected from the group consisting of natural rubbers, polybutadienes, polyisoprenes, and copolymers of butadienes or isoprene with styrene;

at least one ESCR enhancing additive chosen from the group consisting of atactic polypropylene or polyolefin copolymers; and

a chain transfer agent.
